## Editor's Notes

The following list of references has been compiled from various sources on the Web, including several search services, specialized databases, and journal and author homepages, in addition to the journals and reprints themselves. If you note inaccuracies or omissions, please let me know and the correct version will appear in the next number of *MONOCULUS*. Grateful thanks to the donors of reprints to the Monoculus and Wilson libraries.

The year of publication as given refers to the year in which the printed version of the journal was distributed, and not the year when it first became available online, if these are different. This supplement will be posted in pdf format on the WAC website.

Cinira C. Camargo, Cheon Young Chang, Márcia Coelho-Botelho, Cristina de O. Dias, J. Howard Frank, Thomas Glatzel, Maria Hołyńska, Dave Jenkins, Ahmed Öktener, Ivan Pandourski, and Kurt Schminke graciously provided literature references and, in some cases, reprints.

Translations of titles in languages other than English (if not given by the source) are provided by the management.
