Editor's Notes

The following list of references has been compiled from various sources on the Web, including several search services, specialized databases, and journal and author homepages, in addition to the journals and reprints themselves. If you note inaccuracies or omissions, please let me know and the correct version will appear in the next number of *MONOCULUS*. Grateful thanks to the donors of reprints to the Monoculus and Wilson libraries.

The year of publication as given refers to the year in

which the printed version of the journal was distributed, and not the year when it first became available online, if these are different. This supplement will be posted in pdf format on the WAC website.

Apostol Apostolov, Leszek A. Bledzki, Anton Brancelj, Cristina Bruno, Supawadee Chullasorn, David Damkaer, José Eduardo Martinelli Filho, Ivan Pandourski, Watchariya Purivirojkul, Y. Ranga Reddy, and Jeff Turner graciously provided literature references and, in some cases, reprints. Other colleagues including Supawadee Chullasorn have donated reprints of articles that were listed in previous numbers, to the Monoculus and Wilson libraries. Thanks to Samuel Hylander for permission to reproduce the cover of his doctoral thesis. Translations of titles in languages other than English (if not given by the source) are provided by the management.

Huge Man-Made Algae Swarm Devoured — Bad for Climate?

“A short time after scientists pumped iron-enhanced water into oceans off Argentina, tiny shrimp-like crustaceans called copepods (pictured) wolfed down the resulting algae bloom—and a potential weapon against global warming quickly disappeared.”

Recent Publications on Copepoda

Compiled by Jan Reid and Chad Walter

Older publications that were recently listed in the “World of Copepoda” bibliographic database (C. B. Wilson Library) are included. Please advise us if you learn of publications (including theses and “gray literature”), on any aspect of the Copepoda, that are not held in the Monoculus Library or listed in the “World of Copepoda” database.
